Royston

Specialist Lead Products

Royston

Further to manufacturing the leading brand of rolled lead for the building industry, within the 2IM Group we also manufacture Specialist Lead Products for industries such as Medical, Nuclear, Mining and Chemical. Furthermore we manufacture products for ballast and acoustic applications and we are capable of providing totally bespoke requirements upon detailed request.

The source of lead for our specialist products is from the same totally recycled source with the same unique chain of custody. The difference being that products such as these are always formed and finished by using either a casting, machine or extruding process.

Due to the process of manufacture, the lead used cannot be called BS EN 12588. This relates to milled lead only for the roofing industry.

Quality

Royston Lead takes pride in having achieved key standards of certification for quality assurance including:

ISOQAR ISO:9001 - Quality management system for the manufacture and sale of lead products

ISOQAR ISO14001:2004 Environmental management systems for the manufacture and sale of lead products and production of milled lead sheet

ISOQAR BS OHSAS 18001:2007 - Health and safety management systems for the manufacture and sale of lead products and milled lead sheet
